Professional Experience

Principal Investigator | Precision Genomics Lab, NYU Medical Center

July 2014 – Present

- **Achievements:**

- Pioneered CRISPR-based therapies targeting rare mitochondrial diseases.
- Co-founded global data-sharing consortium for underfunded genomic research (RARE-SEQ Initiative).
- Published over 20 papers, including 5 in *Nature Genetics*.

- **Curveballs:**

- Designed collaborative pipelines leveraging **non-English primary datasets** from Latin America and Africa.
- Advocated for early-career **Latinx scientists**, raising institutional funding by 15%.

Genetic Research Associate | Harvard Institute of Genomics, Cambridge, MA

June 2010 – June 2014

- Co-authored breakthrough study on **epigenetic aging markers** now cited in 200+ clinical applications.
 - Recruited for high-profile **Human Genome Diversity Project**, specializing in indigenous populations.
-

Education

Ph.D. in Molecular Biology
Massachusetts Institute of Technology, Cambridge, MA
Graduated: May 2010

B.Sc. in Biochemistry
University of California, Los Angeles, CA
Graduated: May 2006

Other Info (Unstructured)

- **Languages:** Fluent in Spanish and French; Conversational Swahili
 - **Accessibility Tools:** Ergonomic keyboards due to joint issues; noise-canceling headphones for workplace accommodations
 - **Published Datasets:** Open-access contributor to **RARE-Epigenomes** repository
 - **Personal Interests:** Modern art installations featuring genomic data visualizations
-
